Discover now the Wind Energy version of our recently launched ExoFit NEX™ harnesses.

Carros, France. — November, 2010 — Capital Safety announced today the launch in Europe of the ExoFit NEX™ Wind Energy Harness and Accessories. Combining the industry 1st innovations of the ExoFit NEX with additional features developed specifically for the needs of the global wind energy market.

The ExoFit NEX Wind Energy with a convenient radio or Lad-Saf® sleeve holster on the front of the harness and removable tool loops on the belt, this harness allows the user to easily carry equipment on their harness while climbing a tower. The construction model utilizes a removable lumbar protector that helps prevent wear and tear on the belt and back pad. Its ability to be replaced with accessory protectors prolongs the harness life. Certified CE, ANSI and CSA standards, this harness can be taken to worksites across the globe be in compliance with appropriate standards.

Rounding out a full system the harness is complimented by the Shockwave Force2 Global Wind Energy Lanyard. This hybrid lanyard expands and retracts to help prevent a trip hazard and is built with a minimized shock pack to reduce bulk.

The shock pack has a double layer of protection with a PVC cover underneath a Nomex[®]/Kevlar[®] jacket helping the product last in the toughest environments. Rescue rings on the lanyard assist the rescuer in the event of a fall. With multiple approvals as well it provides a global travelling technician with a complete system.
